

Sales missed plan by 4 points

Revenue reached 96% of target on soft e-commerce while stores over-delivered. This deck diagnoses the gap and asks for one decision.

July revenue \$115.2M — 96% of plan

\$115.2M

Repeat rate

+2pt YoY

The miss is entirely e-commerce

Stores hit **103%** of plan; e-commerce landed at **85%** — a \$6.8M shortfall that accounts for the entire gap.

Pharmacy and wholesale were on or above plan. There is no broad demand problem.

Conversion dropped after the June app update

Conversion –0.9pt

Checkout drop-off rose the week the app 4.2 release shipped.

Traffic flat

Sessions held steady — this is not a demand or spend problem.

AOV –3%

Basket size slipped as bundle recommendations stopped rendering.

Two ways to recover the second half

A • Promo push

Discount to buy back volume. Fast, but costs ~1.5pt of margin and does not fix the leak.

B • App fix + retarget

Two-week engineering sprint to restore checkout and bundles, then retarget lapsed carts. Slower, addresses the cause.

Channel detail

CHANNEL	PLAN	ACTUAL	ATTAIN
Stores	62.0	63.9	103%
E-commerce	45.0	38.2	85%
Wholesale	8.0	8.1	101%
Partner	5.0	4.9	98%
Total	120.0	115.2	96%

RECOMMENDATION

Fund the app-fix sprint (\$0.4M); hold promo in reserve. Approve by Aug 12 to recover an estimated \$4–5M in H2.
